

The Carson Daily Appeal

CARSON CITY:

Friday, June 13, 1873.

WE OWN that it is not a pleasant thing—well as we can weigh, and well as we know the value of, words—to be styled "Gorham's pet cur," as Mr. Pixley chooses to call us through the columns of the San Francisco Chronicle of Wednesday. It is not pleasant to be advertised in a great city like San Francisco; but when we come to reflect that if we were a cur of any degree, (which God forbid,) we know we should rather be heard barking the bark of welcome and honest friendship at George Gorham's approach than to be caught snapping at him in the dark, after the manner of a cowardly and leprous dog whom no man dares to touch and no man trusts and whose dirty kennel is the editorial room of the San Francisco Chronicle.

SAYS a dispatch from San Diego:

The news of M. Kenzie's raid on the Kekapoo gives satisfaction, yet it is humiliating to think that the Mexicans cannot follow the Apaches into Arizona who raid into Sonora. Since October over 100 people have been butchered by the Apaches in that State.

This is intended to convey the idea that the Mexicans would, if they might, pursue the Apaches into Arizona. The fact is that the very last thing the Grangers ever will desire to do is to have any sort of encounters with those wily and warlike savages. They wouldn't follow them if they could.

CAP'N JACK has been variously claimed as an outlawed Kentuckian, a Baltimore Demi Rabbit, a Raging Tal, from Cincinnati; a mysterious Jerseyman; a brother of Joaquin Miller; and, amongst the last, a wild Irishman, whose native name is O'Shaughnessy, of the O'Shaughnessys of Tipperary, Ireland. This last claim reminds us of the once rumored Irish origin of Garibaldi. It was said, we remember, with comical seriousness, that the great Italian's real name was Garret O'Edwin and that he was born in Sligo!

LOGGING on the Truckee is a prosperous branch of business; and the State Journal informs us that "the river has been rather high for a few days and Senator Eastman's logs are coming down at a lively rate. Altogether he has about 1,300,000 feet, and if the volume of water remains the same, the logs will all have reached his mill before Saturday night." Eastman has always been a more than ordinarily successful log roller.

A CHINESE NEWSPAPER is to be started in San Francisco. The idea is a good one insofar as it will keep the Chinese of the entire coast enlightened in the intelligence which they most need—that concerning treaties and local laws. Says a San Francisco dispatch:

The steamer Quong Le, which sails for Hongkong on Monday, will take on a letter to that place containing an order for 1,000,000 Chinese type. Four of our prominent Chinese merchants intend publishing a tri-weekly Chinese paper, which will contain all the news contained in our own and country dailies as far as it relates to their race. The type is for them. The initial number will be issued about the 20th of September next. The paper will be devoted to the interests of the Chinese in this State.

HON. JAKE THOMPSON is made of the stuff which wears and tears and lasts well. After all the buffeting and rough knocks of the Rebellion, wherein he played a conspicuous part, he has just encountered the Memphis cholera and "got away with it."

SAN FRANCISCO is just now undergoing her annual wrangle over the Fourth of July. That illustrious warrior, General Cazeneau comes to the front and center as a figure head of one of the brawling clans. Civilization is not much interested in the issue.

LOS ANGELES has illustrated the old axiom that "honor and shame from no condition rise"—specially shame. Here is what makes us say what we do say:

LOS ANGELES, June 11. In the District Court yesterday, the following is a summary of the dismissal of the famous Chinese riot case, which more than anything else has given our city a celebrity throughout the world. It possesses much interest, inasmuch as the decision of the Supreme Court reversing the judgment, is based upon a legal quibble: People vs. Orenshaw et al. The remittitur from the Supreme Court reversing judgment in the case of the defendants, the Chinese rioters, having been received and placed on file, on motion of James Howard, the District Attorney not objecting, the court entered a decree discharging the defendants, now in the State Prison.

This was a case where several peaceable and inoffensive Chinese were set upon by a mob of rowdies and cowards of "Caucasian" origin and got beaten and stabbed and shot to death and their property destroyed and stolen. And this is the justice of Los Angeles—The Angels!

THE DEVIL of the Reese River Reveille office has been elected 2nd Corporal of the National Guard—a military company at Austin. His name is G. D. Succa, but, as the Reveille intimates, is not such a g. d. sucker as his name would imply.

THERE are two sides to all differences; even that in which Cap'n Jack plays the most prominent part has a mitigating side for him. In a dispatch from Yreka, June 11, he is thus reported:

Captain Jack to-day, in an interview with General Davis, charges the blame of the present war upon Allen David, Chief of the Klamath Indians; says he was incited to war by taunts and promises of assistance from David and other of the Klamath chiefs. Jack said Bogus Charley and Schack Nasty Jim killed General Canby. St. Bonchins says he did shoot at Meacham, but did not hit him. Speaking of the commencement of the war, Jack says: "Last winter, on Lost River, Applegate and Brown came and said a big chief was coming to talk and we must go on the reservation. Soldiers came and surrounded us before day and held no talk or council. I did not expect that. I was ash-p. I told them not to shoot. When my boys got their guns the soldiers fired the first gun. I did not think they wanted to talk. After the soldiers began to fire on my people some of my boys fired back, but I did not. I took my things and ran as fast as I could to go away."

A PEEP AT THE FISHES.—A peep into the unfinished aquarium at Woodward's Gardens affords a rare treat. Delays have been suffered in the final completion of the work, or else before this the most attractive feature of the place would have been opened to the public. The visitor passes low down, as it were, through a chamber in a grotto. On each side are clear stone tanks, with glass fronts. These being filled with water, supplied with stones, marine plants and the lower forms of marine life, and stocked with fishes, are lighted up to the spectator by the rays of light passing down through the upper surface of the water and out of the glass fronts. The most perfect exhibition possible is thus obtained. It is difficult to describe the novelty of the sight. There are the marine tanks already filled—one with crabs, etc.; a second with perch, flounders and a variety of small salt-water fish; and a third with star-fish, etc. In each there are very beautiful specimens of the sea anemone. The water is procured from the open sea near the Farallones, where it is found as clear as crystal. Our reporter never before realized the beauty of a fish, and the wondrous grace of its motion. The common specimens of gold fish, so well known, are not to be compared with those seen in the massive aquarium, under the peculiar lights given. One has also a good opportunity to watch and study the habits of the fish while close at the bottom of the sea. The way they nest among the rocks, and even lie down on the pebbles at the bottom, is very interesting to see. There are three tanks already filled with fresh water—one stocked with mountain trout, one with gold fish and another with water-plants. The water is kept in constant motion by a system of overflow and re-supply.

NEWSPAPER LEPROSY.—The Pacific and Surgical Journal, just issued, says of the late sensation: "Some of the San Francisco newspapers are afflicted with Chinese leprosy. Two or three cases of the disease among the Chinese were reported two years ago, and now after two years of incubation it is communicated to the managers of the press. A writer who adds 'M. D.' to his name appears to be severely afflicted, and would be consoled by the appointment of a Medical Officer, who has had experience in the disease, to look after it, himself having had experience, and so forth. We can not learn that a solitary case of leprosy exists, or has lately existed in the city, except among the newspapers."

LATEST TELEGRAMS.

NEW YORK, June 12.—The Graphic publishes an extract from a private letter, dated Rome, May 15th, which tells of a rumor prevalent in that city that Pope Pius IX died some days previous, and that his place is filled by an old and astute priest named Abbate Minati. The story goes that when the news of the Pope's fatal illness was published, the Cardinals hastened to the Vatican to take in the condition of affairs. They found the situation an exceedingly critical one for the Church. It seemed to them that nothing could be more inopportune than the death of the Pope and the election of his successor at this moment, so they determined upon a stroke of the most daring and astonishing character. There was a priest of the Order of Benedictines Abbate Minati, who bore a striking resemblance to Pius IX; accordingly they determined that Father Minati, in the event of the Pope's death, should enact his part. The Pope died, but instead of their announcing the fact to the public, they began to inform the outside world that the Holy Father was getting better, and finally that he was quite well again, the fact being that the remains of Pius IX were hidden away in some secret recesses of the Vatican cellars, and that Abbate Minati quietly stepped into his place.

WASHINGTON, June 12.—The Secretary of the Navy will show first, That Captain Hall died a natural death; second, That the parting from the Polaris by Captain Tyson and his men was purely accidental, and that no blame on this account is attached to Captain Buddington; third, That to a great extent the objects of the expedition were accomplished before the death of Captain Hall; that is, that he reached a point of latitude not attained heretofore by any Arctic expedition; fourth, That the Polaris will return here before the end of summer. He has concluded his examination of the survivors of the Polaris, and has commenced the preparation of his report. It will be finished in a few days, and, with the evidence of Captains Tyson and Myers, the Esquimaux Joe and Hans and several of the crew, will be given to the public.

SAN FRANCISCO, June 12—1 P. M.—J. J. Henderson of Portland, Oregon, Consul to Amoy, is in the city at present. He will sail for his destination on Monday next.

It is stated that another billiard match will be made for a larger sum between H. Merrifield and Lance Perkins. The last game was for \$1,000 a side.

Chas. B. Bond, Secretary of the Fireman's Insurance Company, died suddenly to-day, it is supposed from heart disease. Flags over all the insurance companies are at half-mast in honor of his memory.

Information was brought to the Coroner last night that the body of a man had been found in the bushes on Park avenue. The Coroner rode to the place and found the body of a man who appeared to have been dead two or three days. A letter was found by the body directed to Asa Cowing from his mother, Clara Cowing, Yarmouth, N. H. A small sum of money was also found on his person. It is believed that he committed suicide by taking poison.

A thousand people attended Whipple's horse sale yesterday. Harvest Queen brought \$16,500.

The steamer Ventura, the old Resaca war steamer, went on her trial trip to-day, with a large number of invited guests on board.

Each of the Fourth of July Committees hold a meeting to-night.

G. M. 117: greenbacks, 85% @ 86 3/4.

SAN FRANCISCO, June 12—3 P. M.—The examination of the Italian Gazette of the Pacific editor, Frank Rosas, for rape, commenced to-day before the Police Court. This far only medical testimony has been offered, and it is unfit for publication. Suffice it to say the child is unable to appear in court, and has lost the sight of one eye in 24 hours. The medical testimony against the prisoner and in his favor also, proved very damaging.

THE DEMAND FOR POSTAL CARDS.—The order for postal cards received by Special Agent Tyner are accumulating together beyond the rate of production. Orders have been received within the last ten days of production to the amount of 17,671,500, or more than one tenth as many as the present facilities of the Morgan Envelope Company could supply, working, as they are now worked, twenty hours out of the twenty-four, for a year. The whole number of cards it is possible to print or cut with the present machinery, by working as now for a year, would be, 172,800,000; but with the necessary discount for imperfect cards, the total is estimated 165,000,000. The capacity of the works is now less than 600,000, while the orders have averaged one and three-quarter millions a day. Order number eight contained requisitions from two hundred and fifty postoffices. The orders are filled by agent Tyner with as much respect to the order of their receipt as possible but of course the larger cities must be fed first. New York, which consumes one-sixth of all the stamps and stamped envelopes made, has had 1,000,000 postal cards and ordered 500,000 more; Boston has had 1,000,000 and ordered as many more; Chicago has had 500,000, and ordered 300,000; Philadelphia has been sent 500,000, and ordered the same; St. Louis has had 500,000, and ordered 1,000,000; San Francisco had half a million, and wants as many more. Springfield has ordered a second time, but it will be some time before her turn is reached again. The Morgan Company, in this state of affairs, are of course feeling the need of machinery. They have now three cutters in

operation, which do not keep up with the present press. It is intended to add four cutters, probably one this week, one next week, and so on. Another Hoe press, of which Mr. Morgan has had the refusal since the purchase of the one now in use, must also speedily arrive. It is not supposed that the present rate of demand will continue through the year, but by the terms of the contract the Morgan Envelope Company are obliged to furnish according to the demands of the department a specified number, "more or less." At present the demand is for "more."—Springfield Republican.

Procbe and Bullionville are at last happily united in the bonds of a narrow gauge railroad. May the course of their true love never cease to run smooth.

REMARKABLE.—A woman in Virginia, Nevada, held her jaw while twenty-six teeth were drawn, which is the greatest case of drawing yet reported, not even excepting Pattee's, in Omaha. Old Holmes, sweet, sweet Holmes, draughted on the woman.—New Endowment.

WANTED.

A SITUATION TO DO HOUSE-Work, Chamber Work, Sewing or Nursing. For information call on Jell-1w APPLY AT THIS OFFICE.
